OBJECTIVE

Dedicated to the pursuit of a B.Tech degree with a specialization in Computer Science. Actively seeking opportunities to apply a diverse skill set in a practical setting. Proficiency in machine learning demonstrated through projects such as a face recognition system using Convolutional Neural Networks (CNN) and a spam detection mechanism employing the Multinomial Naive Bayes algorithm. A strong foundation in software development, technical support, programming languages, and data analysis, combined with a passion for innovation and continuous learning, prepares for excellence in collaborative environments and tackling real-world challenges. Enthusiastic about mentorship opportunities and confident in the ability to make meaningful contributions while progressing towards career goals.
